Art Unit: 1724

The following is an examiner's statement of reasons for allowance:

Franks describes a deionizer apparatus in which influent water passes downwardly through an influent conduit before passing upwardly through a bed of resin.

The resin bed is not a "mixed bed resin." As defined by applicant's specification, a

"mixed bed resin" is a blend of a cationic resin and an anionic resin in an equivalent

ratio of 1:1. Page 1 lines 15 – 16. The prior art does not suggest substitution of a blend

of a cationic resin and an anionic resin in an equivalent ratio of 1:1 for the bed of "fast

kinetic resin" described by Franks. Any comments considered necessary by applicant

must be submitted no later than the payment of the issue fee and, to avoid processing

delays, should preferably accompany the issue fee. Such submissions should be

clearly labeled "Comments on Statement of Reasons for Allowance."
